Arena Training Series

Chapter 4 Arena advanced features – Part I

UNITED WORLD
WRESTLING

Agenda

- Managing persons, teams
 - Updating person record
 - Import Athletes
 - Changing weight category
- Blockchain draw
- Referee management
- Synchronization
- Operations (upgrades, beta, custom config, flags)
- Non-Olympic styles

UNITED WORLD
WRESTLING

Managing Persons, Teams

- Person->Athlete->Fighter
- Required when
 - Typo in name
 - Wrong Preferred/Short Name value
 - Missing values
- Import Athletes
 - Import file format
 - Importance of Athena/Custom ID – No Person duplications through imports
- Modifying weight category
 - Do only before draw, or generating matches

Blockchain drawing

- Random numbers are taken from a decentralized, public “database”
 - Transparent, audited, unalterable, tracked
- Documentation: <https://unitedworldwrestling.org/bcdrawing>
- Brackets contain details, QR code to demo page
 - Draw can be verified anytime after. As per in the documentation, or via the Blockchain Info page
 - Example: **Senior Pan-American Championships for Freestyle - Seniors - 61 kg** (Ottawa - 06-Mar-2020)
<https://unitedworldwrestling.org/bcdrawing?id=9633437>
- Only need Internet access at the time of Draw (taken block are valid for 10 minutes only)

Referee management

- Add/import referees
- Assign them to mat
 - Rotate them easily if required
- Let Arena assign referees to matches automatically
 - Referee's country/team is used to determine conflict of interests
- Onvenue – Referee Call Room
- Print scoresheets with Referees
