

UNITED WORLD
WRESTLING

The background of the entire page is a photograph of two male wrestlers in a physical struggle. One wrestler is in a low, defensive crouch, while the other is leaning over him, attempting to control him. The image is overlaid with a semi-transparent blue filter and geometric shapes like triangles and lines, creating a dynamic and modern aesthetic.

Long term storage & Re-analysis

N/A

2019 ACTIVITIES SUMMARY

- ✓ In the framework of the WADA Code Compliance Monitoring Program, the ITA assisted the UWW in the implementation of certain corrective actions issued by WADA in the scope of the Corrective Action Report (CAR) issued after a WADA audit. In particular, the ITA provided responses, documentation, policies and/or general guidance in the following areas of the compliance programme: ADAMS; Budget & Report; Testing & Investigations; Results Management.
- ✓ **979 Urine** and **458 hGH** samples were collected In Competition and Out of Competition during the 2019 UWW Testing Programme.
- ✓ Of the **269 OOC** test attempts coordinated by the ITA on behalf of UWW, 13% were unsuccessful. The average across other sports is 10%.

UNITED WORLD
WRESTLING

2019 ACTIVITIES SUMMARY

- ✓ The ITA coordinated IC testing at **26 UWW events** during 2019 collecting **744 Urine** and **41 hGH** samples.
- ✓ UWW's Testing Programme generated **1,838 Steroidal notifications** consisting of **422 atypical** notifications.
- ✓ This resulted in **13 IC/OOC APMU test recommendations**, **44 IRMS analysis requests** and **9 samples were stored** as part of UWW's Long Term Storage Strategy.

**RISK ASSESSMENT
&
TEST DISTRIBUTION PLAN**

RISK ASSESSMENT

In collaboration with the UWW, ITA elaborated a Risk Assessment aligned with WADA's ISTI. This service includes:

- ✓ the collection of a large spectrum of data that influence the risk of doping in Wrestling
- ✓ the integration of this material in a structured methodology that assess the Physiological / Country / Individual Risks
- ✓ the analysis and combination of all the relevant parameters to provide the prerequisites for an effective and proportionate Test Distribution Plan

Please refer to the 'UWW Risk Assessment' document which was sent in April 2019.

TEST DISTRIBUTION PLAN

ITA in consultation with UWW, developed a tailor-made TDP that prioritizes appropriately between: disciplines (physiological risk), athletes (country, performance & testing history risks), periods during the season, types of testing, types of samples collected and types of analysis according to the TDSSA. This TDP was also updated regularly as and when additional and relevant information was provided such as APMU recommendations and intelligence.
